							89	3.71	11

Source: opinion Survey

SA= Strongly Agreed, A= Agreed, U = Undecided, D = Disagreed, SD = Strongly Disagreed, NR = Number of Respondents, TR = Total Respondents, WA = Weighted Aggregate, WI = Weighted Index

Based on the survey a few factors are identified and weighted index computed to find out the ranking of the factor according to their importance to the respondents using weighted index formula. To determine the important factors which need immediate attention for providing quality higher education consideration has been made to arrange those factors on the basis of a rank. Again, this rank has been constructed on the basis of weighted index of each of the factors. This weighted index of each factor has been constructed on the basis of 5 points Likert Scale imposed on the number of responses against each of the factors. For each factor response have been arranged and put on the scale. This is converted into quantified values of the weighted aggregate (). This weighted aggregate then has been expressed as a weighted index by using the formula: $WI = \frac{\sum fi wi}{\sum fi}$
